1.🧠💻 CODE CLASH – The Ultimate Coding Battle

🎯 Event Type

Technical / Individual or Team Event

👥 Participants

- Open to all courses (optional)
- **BCA students get the natural edge 😉**
- Individual OR team of 2 (your choice)

🏆 Objective

To test participants on:

- Logical thinking
- Programming fundamentals
- Problem-solving speed
- Code accuracy under pressure

🕒 Event Duration

60–90 minutes total

🧩 EVENT FORMAT (3 ROUNDS)

🔹 ROUND 1: Logic Sprint (Elimination Round)

⏱️ Time: 20 minutes

What happens:

- MCQs based on:
  - Output prediction
  - Basic algorithms

    - Logical reasoning
- Languages:
    - C / Python / Java (mixed)

Example Questions:

- What is the output of this code?
- Which loop executes faster?
- Identify the correct logic

👉 **Top 50% qualify**

🔹 **ROUND 2: Debug Dash 🐞**

⏱️ Time: 20–25 minutes

What happens:

- Given **buggy code**
- Tasks:
    - Find syntax errors
    - Fix logical mistakes
- Simple to medium level

Evaluation:

- Correct output = points
- Faster submission = bonus

🔥 This round separates *real coders* from mug learners.

🔹 **ROUND 3: Final Code Battle ⚔️**

⏱️ Time: 30 minutes

What happens:

- 1 or 2 **real-world problems**
    - Example:

        - Student result processing
        - Simple billing system
        - Pattern or number problems
- Language choice:
    - C / Python / Java

Judging Criteria:

- Correctness
- Logic clarity
- Time complexity (basic level)
- Code readability

🧮 SCORING SYSTEM (Simple & Fair)

Round	Weightage
Logic Sprint	20%
Debug Dash	30%
Final Battle	50%

🖥️ REQUIREMENTS

- Computer lab
- Basic IDE / compiler
- Question papers (printed or digital)
- Timer / projector

📜 RULES (Short & Clean)

- Internet not allowed
- No external storage devices
- One language per round

- Judges' decision is final

🎁 WINNER TITLES

- 🥇 Code Clash Champion
- 🥈 First Runner-up
- 🥉 Second Runner-up

(Optional)

- 🧠 Best Logic Thinker (BCA Exclusive Award 😉)

📣 HOW THIS HIGHLIGHTS BCA

- BCA students design:
  - Questions
  - Evaluation system
  - Live scoreboard
- Shows **practical coding strength**
- Other departments clearly see BCA's technical dominance

📝 One-Line Description (For Poster)

Code Clash – A high-intensity coding competition that tests logic, debugging skills, and real-time problem solving.

🎤 Anchor Intro (You can literally read this)

"Welcome to Code Clash, where logic meets speed and code decides the champion."

---

2. Tech Quiz (IT-Focused)

- Topics:
  - OS
  - DBMS
  - Programming
  - AI & Cybersecurity
- Add **rapid-fire buzzer round**

3. 🏆 BEST "GAMING ZONE" EVENT PACKAGE

✅ PUBG / BGMI Classic (Main Event)
✅ Free Fire Classic (Main Event)

4. Keyboard Ninja

🏆 **Event Format (Recommended)**

🔹 **Round 1: Speed + Accuracy Test**

⏱️ Time: 2–3 minutes

- Provide same paragraph to all
- English (or Kannada/English mix if you want fun)

Scoring:

- WPM (Words Per Minute)
- Accuracy %

📌 Rule: Minimum **90% accuracy** to qualify

👉 Top 20 qualify

🔹 **Round 2: Final Challenge (Harder)**

⏱️ Time: 3 minutes

- Longer paragraph with symbols, numbers

- Example: emails, code-like text, etc.

Winner decided based on:

- Highest WPM
- Highest accuracy

💡 Extra Twist (Very Fun)

🧬 Code Typing Round (BCA Special)

Give them a short C/Python code snippet and ask them to type exactly.

Example:

```
for(i=0;i<n;i++)
{
  sum=sum+a[i];
}
```

This is AMAZING because it feels like a real IT fest event 🔥

📌 Rules (Official Style)

✅ Participants must use assigned system
✅ No copy-paste allowed
✅ No auto-correct tools
✅ Same text for all participants
✅ Judges' decision final

🎯 Why This Event Is Excellent

- Highlights keyboard skills (BCA identity)
- Quick to organize
- Can handle large crowd in batches
- Works even without internet

🗓️ Best Time to Conduct

📌 Day 1 Afternoon or Day 2 Afternoon
(When lab is free or using projector in classroom)
